J.I.S. Small Head Cap Screws

J.I.S. B 1180 • Steel • Heat Treated • I.S.O. Class 8.8 • Zinc Plated

J.I.S. fasteners have a smaller hex dimension (across the flats) than DIN or ISO metric fasteners. They fit in those tight spots where the hex of an ISO or DIN fastener is too large. J.I.S. fasteners are OEM equipment on many GM and Japanese import car applications.

U.S.S., S.A.E. & Metric Bolt and Nut Gauge
Excellent for sizing bolts, screws, nuts (USS, SAE, and Metric) and twist drills. You size the bolt diameter by pushing the bolt through the sizing holes. Also gauges hex nuts and washers (USS & SAE) while metric hex nuts and washers can be measured by holding them under the metric holes.

The back of the gauge includes a feature for measuring U.S. and Metric thread pitch. Special notches on the front of the tool allow you to measure flat head metal and wood screws.

Made of sturdy, light weight green plastic that resists water, alcohol, oil and grease.

Metric Bolt & Nut Gauge

Determine the diameter of the bolts by pushing them thru the holes. Measure the hex head of bolts & screws or the "across the flat" dimension of hex nuts in the recesses around the holes (listed as wrench size). Right-hand side of tool measures thread pitch (1.00, 1.50, 1.75 & 2.00)

AUVECO THIN SHEET NUTSERT® INSERTS

Sec. 9

U.S.S., S.A.E. & Metric -Steel & Aluminum

Threaded Inserts For Thin Material

The Auveco Thin Sheet Nutsert® has been designed to provide a highly efficient method of securing threads from one side of the work in materials generally too thin to support threads. Its performance has been proven in plastic, aluminum, mild steel and fiberglass withstanding high loads without vibrating or loosening under extreme operating conditions. The Auveco Thin Sheet Nutsert® is a tension fastener with high pull out, insuring no rotation or vibration where a cover plate is used. The system's unique blind tooling installs TSNs at consistent rates using unskilled labor.

How It Works

The Thin Sheet Nutsert®, held securely by the tool, is placed into a prepared hole. Upon the tool's actuation, the threaded portion is pulled until the fastener's wall collapses radially outward, clinching it tight against the sheet. The tool is withdrawn, leaving the Thin Sheet Nutsert® ready to receive a bolt or screw. This complete operation takes only a few seconds and can be performed by anyone.

1. Insert TSN into prepared hole.

2. Engage the tool

3. TSN installed With standard head configuration

Strength Tests: Torque Strength -With an attaching part over the Thin Sheet Nutsert®, offering a bearing surface, the TSN will remain intact past the point of the screw or bolt breaking (head torqued off). In almost all cases the threads of the TSN will remain undistorted and serviceable -an exception to this statement is when an extremely high tensile bolt is used.

Steel: 1010 Low Carbon Steel, Type 11 Class 3 with Zinc Plate, Clear Chromate

Aluminum: Aluminum Alloy 5056, Plain Finish, Metric Class 6H, U.S. Class 2B

To Set Nutserts®, Use Tool 11805 & Conversion Kits Listed On Page 92.

Sec. 9 LARGE FLANGE THIN SHEET NUTSERT® INSERTS

U.S.S., S.A.E. & Metric -Steel & Aluminum

The Large Flange system provides captive threads in materials too thin to independently support threads, or where costly tapping operations are to be eliminated. The Large Flange fastener can be used as a rivet to join materials that will ultimately have a separate component attached.

Materials: Low Carbon Steel, Zinc Plated
(Metric: Zinc & Yellow Plated)
Aluminum Alloy, Plain Finish

To Set 8-32, 10-24 and 10-32 Large Flange Nutserts®, use tool 11805 and conversion kits listed on page 92. 1/4"-20, 5/16"-18 and 3/8"-16 Large Flange Nutserts® require a pneumatic tool for installation. They **cannot** be set with 11805.

NUTSERT® INSERTS

U.S.S. & S.A.E. THREAD

The Auveco Nutsert® was developed to offer both the production-oriented designer and engineer a unique and versatile anchor nut-type insert for high-speed installation. This Auveco system gives the designer the option to design for **blind** or **open** applications, eliminating and simplifying his design problems.

The Auveco Nutsert® system provides a cost-saving method of installing clean, load-bearing steel threads in castings, fiberglass, fiberboard, plastics, wood or almost any ductile material more than .030" thick.

A simple hand tool installs the Nutsert®...it is ready for use in seconds... no finishing is required after installation.

Auveco Nutsert's® advanced design offers unlimited grip range in a minimum of sizes...inventory is minimized to one body dimension per thread size; ideally suited for blind...buried... and through holes. The ingenious "taper-lock" principle locks-in the Nutsert® preventing spin or twist; installs in flat or curved surfaces and is self-tightening with repeated use. The unique design of the installation tool eliminates marring of the parent material surface.

Material: Mild Steel, Tin Plated
Minimum Grip: .030"

HELICAL THREAD REPAIR INSERTS & KITS

For Repairing Stripped Or Damaged Threads

The most effective and universally accepted method of thread repair.

Inserts quickly and permanently restores stripped, worn or damaged threads to their original size and condition.

Easy to use... just 1. Drill 2. Tap 3. Install
Now you're back to the original size and
the original size fastener can be used.

When threads become stripped, worn or damaged for any reason, the strength and reliability are greatly reduced. When this happens on critical threaded assemblies, cars, and other types of equipment, it may become unsafe to operate.

These potentially dangerous situations are eliminated when the damaged thread is repaired with a thread repair insert. The threaded insert provides stronger, more reliable threads than the original tapped hole and at the same time eliminates the possibility of thread wear, seizing and corrosion.

WASHERS

Vibration Proof Lock Washers

For Use With Grade 5, Grade 8 & ASTM 574 High Grade Bolts
Zinc Flake Coated

These washers have cams or wedges on one side, with a lead angle greater than a thread angle, and radial teeth or ribs on the other side. The washers are installed cam face to cam face. When tightening the fastener to preload, the teeth penetrate and seat against the joint material and the nut and/or fastener head. When subjected to vibration the interacting cams create a wedge action which prevents the fastener from vibrating loose.

Sealed Crimp & Solder Terminals & Connectors

Crimped for mechanical reliability, soldered for superior strength and conductivity, and sealed with heat shrink tubing for maximum durability.

THE CRIMP CONNECTOR

- There are crimp indicators which show where the installation tool should be positioned
- Wire-stops in butt connectors prevent over-insertion of the wire
- Window in the connector allows for visual inspection & solder to flow into

THE SOLDER

- Flux coating to clean metal surfaces
- Low-temperature solder alloy for ease of installation
- Pre-measured solder to provide the right amount of solder to ensure a solid termination

THE HEAT SHRINK TUBING

- Adhesive lined polyolefin to seal the connection
- Translucent tubing to allow for visual inspection

SPOOLED FUSIBLE LINK WIRE

The lower the gauge number, the thicker the wire (i.e. 10 ga. is thicker than 16 ga.)

A fusible link is a special section of low tension cable installed by an OEM and designed to open a circuit when subjected to extreme current overload. Its purpose is to minimize wiring system damage when such an overload accidentally occurs in those circuits protected by the fusible link. A short circuit causes the fusible link to act as an element in a "slow-blow" fuse. A fusible link is not intended to be used in place of a fuse but only where a fuse cannot be economically employed. Our fusible line wire meets the requirements of SE J-156 and the insulation has the characteristics as listed for EAE, SE J-1128 Type SXL. The vehicle manufacturer should be consulted about questions on fusible link length and size. General practice has been for a fusible link to be 4 gauges smaller than the circuit wire. Example: if the circuit wire is 12 gauge, use a 16 gauge fusible link. Final determination should be based on O.E.M. application. Note: Extreme care should be taken to always replace a fusible link with the same gauge and length as installed by the manufacturer.

COMPRESSION BATTERY CABLE TERMINALS **Sec. 12**

All clamps and lugs are made of cast copper • All clamps, lugs and fasteners are tin plated

Assemble with common hand tools.

Three Easy Steps

1. Strip 3/4" of insulation from the end of the cable. Insert bared wire into the compression nut.
2. Thread terminal on compression nut.
3. Grip compression nut with wrench and turn the terminal until the compression nut seats. With larger gauges you may want to hold the terminal in a vise.

FUSE ACCESSORIES

A quick, easy alternative to direct wiring when tapping the "hot side" of the fuse block.

14474

Blade Type Fuse Tap

The blade type fuse tap is made of sturdy brass and is engineered for quick connect and disconnect of accessories such as C.B. radios, hand-held lights, etc. Installation can be completed in three steps.

1. Use a test probe to locate the "hot side" of the circuit in the fuseblock. Then snap the tap over the corresponding "hot side" blade of the fuse. Insert the fuse into the fuseblock.
2. Crimp one end of an in-line fuse holder (with the fuse installed) to a fully insulated nylon .250" female quick-connect terminal. Attach the other fuse holder lead to the accessory wire.
3. Complete the connection by sliding the female quick-connect terminal onto the protruding tab of the tap.

Routing Clips

A quick, economical method of fastening wires, tubes, hoses or rods from 1/4" to 1" diameter to metal, plastic or any other surface ranging from 1/32" to 1/8" thickness. Clips are molded of durable black nylon plastic. They snap into 1/4" diameter holes and are held firmly in place by flexible "snubber tips" which compensate for variation in wall thickness.

POP® MULTI-GRIP BLIND RIVETS
 Functions In A Wide Range Of Material Thicknesses

The Multi-Grip rivet will serve in applications where solid and soft materials and thicknesses normally require several rivet sizes. Oversize, irregular or misaligned holes are automatically compensated for by the self-adjusting hole-filling capability. The mandrel head is retained in the rivet body, forming a tight, weather resistant seal.

Body Hardware & Specialty Fasteners,
Only One Name Comes To Mind..... Auveco***

What Makes Avex® Different...And Better?

The Avex® rivet adds important... and exclusive...features to those offered by ordinary blind rivets. The unique advantages designed into the Avex® rivet allow for its use:

In wide-tolerance holes. Since the rivet can expand up to its own head diameter, accurate hole sizing or alignment is not necessary.

To pull sheets together. The extraordinary rivet tail expansion automatically effects superior clamp-up action on the parts being assembled.

Over a vast range of thicknesses. The "dubble-bubble" expansion feature offers the capability to fasten securely in both thick and thin grip ranges with a single length rivet.

While providing a sealed stem. The rivet material flows both behind and in front of the mandrel insuring a positively retained and sealed stem.

The System

Blind Installation -The single side installation feature of the Auveco Monobolt System allows one operator to produce high quality structural joints in seconds. Use of the Monobolt power tool does not require special skill or training, because the tool completely controls the installation cycle.

Multi-Grip One size Monobolt fastener will function effectively in a wide range of material thicknesses (Example: .080" to .375"). This versatility decreases the potential for production errors and reduces fastener inventory requirements.

Uniform Clamping Action Monobolt fasteners are engineered to draw materials together by developing positive clamping action.

And Its Advantages

Structural Fastening An installed Monobolt fastener yields high shear and tensile values. Conventional fasteners can be replaced by Monobolt without compromising structural requirements.

Positive Stem Retention: At the completion of the installation cycle, the stem is mechanically locked into the Monobolt shell, creating a vibration-proof joint of assured structural quality.

Flush Break Stem: Within the specific grip range for each size, Monobolt fastener, the stem is designed to break flush with the low profile head. Secondary finishing operations, such as grinding or milling, are not necessary to achieve good product appearance.

Complete Hole Fill: During installation, the Monobolt shell expands into 360° contact with the walls of the parent material. This feature, in conjunction with positive stem retention, produces weather resistant joints.

Quiet, Safe Installation: The Monobolt System, operating at 85db ("A" Weighted), complies with OSHA regulation governing plant noise levels and operator safety

How It Works

1. The Monobolt fastener is loaded into the nose of the placing tool and inserted in a prepared hole. As the tool is actuated, the pulling jaws grip the Monobolt stem.

2. An axial pull draws the stem through the shell, expanding it radially. During this phase, the hole is completely filled and work pieces are drawn together.

3. When the stem reaches a pre-determined position within the Monobolt shell, it separates flush with the head profile regardless of work piece thickness. Simultaneously, the stem section remaining in the shell is mechanically locked in place by the Monobolt tool.

INTERLOCK® DOME HEAD HIGH STRENGTH RIVETS

High strength Interlock® rivets feature a positive mechanical locking system that provides superior holding power. This system also guarantees 100% mandrel retention that's visually verifiable. Can be set with Auveco rivet gun 11817.

AUVECOPAK

The AuvecoPak merchandisers (**AP448S** and **AP448L**) provide **448** of the fastest moving, most popular automotive body hardware and specialty fasteners in a **one-price** package all on one **7-panel merchandiser**. Each panel contains 32 part numbers per side. **The AP448S (Starter Merchandiser) consists of one package each of the 448 part numbers. The AP448L (Large Assortment) includes two packages each of the 224 most popular items and one package each of the other 224 part numbers for a total of 672 packages.**

With just a glance, two attractive header signs identify the AP448 as an Auveco merchandiser, the name synonymous with automotive body hardware and specialty fasteners. An eye-catching color scheme and graphics on the front facing cards not only make the merchandiser visually appealing but at a glance they portray the contents of the merchandiser as well.

Initial set-up is as easy as 1-2-3 since the panels come **"pre-dressed"** with the AuvecoPaks already in place. Simply position the top and bottom brackets on a gondola or pegboard wall. Insert the panels into the brackets and you're ready for business.

An individual panel measures 6-1/2" (wide) x 17-1/2" (front to back) x 44-1/2" (high) – maximum coverage in minimum space. AuvecoPak 7-panel merchandisers (**AP448S** and **AP448L**) **fit on a gondola with 48" x 48" of pegboard** or on any pegboard wall.

A gondola is not included with the AP448S or the AP448L. Auveco customer service reps can recommend a source for gondolas.

The attractive green AuvecoPak packages feature eye-appealing, contemporary graphics with all the necessary application and descriptive information in **trilingual verbiage** (English, Spanish and French-Canadian) as well as locator codes that identify their location on the panels. The AuvecoPak part numbers are the same as the standard Auveco part numbers with an "AP" prefix. Thus AP11146 is the AuvecoPak version of 11146.

We've made re-ordering a snap by putting the AuvecoPak part number and a **UPC-A bar code** on the panel back-up boards beneath each hook. Then restocking the merchandiser is also quick and easy since the AuvecoPak packages contain **locator codes** that identify their specific location on the panels.

AP448S (Starter Merchandiser): one package each of 448 part numbers

AP448L (Large Merchandiser): two packages each of the 224 most popular items and one package each of the other 224 part numbers for a total of 672 packages.

GROMMETING & TIRE VALVES

Flexible Serrated Polyethylene Grommeting (Natural Color)

Grommeting is primarily used to protect wires and cables from sharp panel edges. Wires that are routed through knock-outs or over sharp edges need to be prevented from chafing against those edges. Grommeting can also be used to protect the edges of glass, sheet metal, wood panels, or other sheet-form materials. Depending on the panel thickness of the application, grommeting may grip tightly by itself—if not, a touch of epoxy will keep it in place.

Universal Windshield & Rear Window Flex-Fit Rubber Moulding

20342

A universal windshield rubber moulding for domestic and import vehicles. Made of EPDM rubber, this moulding contains a butyl bead that adheres to the glass during installation. The profile design allows for the moulding to attach easily to the glass edge and lay evenly on the vehicle body along straight areas and around corners. Extruded with a metal filament to prevent stretching and shrinkage.

Pop on Screw Covers & Bases

Covers-Matte Finish

Ultra Violet Stabilized Polypropylene covers and bases help shield screws from corrosive environments. Their smooth finish forms a protective barrier against rough-edges.

For use with flat head and oval head tapping screws and round head machine screws.

They're simple to use:

1. Place washer over pilot or starting hole for screw, nail or rivet.
2. Install fastener
3. Place Snap Cap over washer
At slight angle.
4. Simply push Snap Cap down firmly.

**PUT AN END TO CONTINUAL
TAILGATE CABLE REPLACEMENT!**

20872

2004 - 1999 full size GM Pick-Up Trucks are originally equipped with galvanized, braided steel tailgate cables that may corrode, weaken and eventually break. Auveco's 20872 stainless steel tailgate support straps are the ideal replacement. Our support strap is stronger and more durable than cable. It mounts the same as the original cable, uses the same hardware and can be installed in 15 minutes. The 20872 can be used for both sides of the tailgate.

**GM Truck
Door Hinge Pin & Bushing Repair Kits**

Why bother with the hassle of cutting and grinding off a worn door hinge and welding on a new one when you can repair the bad hinge in a fraction of the time?

With our Door Hinge Pin & Bushing Repair Kits, fixing sagging doors caused by worn hinges due to pin failure is quick. It's easy. It works. And you don't have to repaint the welded heat flash area.

Each kit is designed to repair one hinge and contains all the pins, bushings and related hardware to do the job.

Here's how it works:

1. Remove the door from the truck body
2. Remove the original equipment pin and bushings
3. Install the bushings into the hinge holes
4. Install the longer pin into the top hinge hole
5. Thread on the lock nut
6. Install the shorter pin into the bottom hinge hole
7. Place the washer and a nut on the shorter pin
8. Tighten the nut to pull the pin into place.
9. Slowly tighten both upper and lower lock nuts
10. Reattach the door to the truck body

Detailed instructions are included with the kit.

Dodge Truck Door Hinge Bolt & Bushing Repair Kit

For 2003 – 1994 Dodge Ram 1500, 2500 & 3500 Pick-Up Trucks

Why bother with the hassle of cutting and grinding off a worn door hinge and welding on a new one when you can repair the bad hinge in a fraction of the time?

With our Door Hinge Bolt & Bushing Repair Kit, fixing sagging doors caused by worn hinges due to pin or bushing failure is quick. It's easy. It works. And you don't have to paint the welded heat flash area.

Each kit is designed to repair one hinge and contains one zinc and yellow dichromate plated grade 8 bolt, two self-lubricating brass alloy bushings, one zinc plated spin lock nut and one zinc plated internal lock washer.

Here's how easy it is:

1. Remove the door from the truck body.
2. Grind or cut off the end of the pin at the peened end.
3. Remove the old pin and bushings.
4. Install the bushings into the hinge holes.
5. Place the washer on the bolt and install the bolt into the bushings.
6. Thread the nut onto the bolt and tighten.
7. Reattach the door to the truck body.

Norma Torro (European Style) Hose Clamps DIN 3017 • Stainless Steel Band & Housing • Zinc & Yellow Steel Screw

Unique off-set non-welded design of the housing provides resistance to over-tightening damage to the hose. The short housing saddle gives a smooth underside ensuring high sealing efficiency. These clamps are original equipment on both domestic and import vehicles. They are particularly suited for fuel, vacuum, water, emission and heater hoses and can be used with silicone hoses.

STOP EXCESSIVE COOLANT CONSUMPTION OR LEAKAGE!!!!

20574

Engine Manifold
Repair Kit

UNIT PACKAGE: 1 Kit

2003 - 1995 GM vehicles with 3.8 L series 2 engines (VIN K - RPO L36) have been experiencing excessive coolant consumption or coolant leakage near or under the throttle body and intake manifold. This is caused when the EGR tube on the lower manifold degrades the composite material of the upper intake plenum around the passage area between the two part manifold. Once the composite material is degraded, it becomes porous and allows the coolant areas on either side of the EGR passage to leak coolant either internally or externally. If it leaks internally into the intake manifold and then the cylinders, it can result in "hydro-lock" of the engine. A simple coolant leak has resulted in a major problem that as best requires changing the spark plugs and oil in order to start the engine. That doesn't correct the cause of the problem though.

Until now, the solution has been to replace the upper plenum and lower manifold at a retail cost of \$1200 - \$1400 for parts and labor. Yet that alone does not correct the root cause of the problem. Our **20574 repair kit** offers an inexpensive but highly effective and permanent solution. Here are the steps involved:

1. Remove the upper intake manifold.
2. Remove the EGR tube from the bottom plenum.
3. Install our new EGR port tube.
4. Use epoxy supplied with our repair kit to install our new adapter bushing in the upper plenum.
5. Reinstall the upper intake manifold.
(Detailed instructions are included with the kit)

As an added benefit, the smaller diameter of our EGR port tube creates an air space between the repaired (with adapter bushing) upper plenum and the new EGR port tube. This air space insulates the composite material of the plenum from further damage.

Hardens Like Steel in 20 Minutes

Fix-it Quick will plug or seal practically anything that leaks, it will patch holes and cracks, mend almost anything that is broken. It is excellent for rebuilding or fabricating parts and as an all purpose adhesive for metals, wood, glass, masonry, ceramics and many plastics. Also, it can be drilled, tapped, filed, sanded and painted like metal. Sets steel hard in 20 minutes.

Hints For Use

- FixitQuick adheres to most surfaces. Best results will be achieved if area is first roughened by sanding or filing to clean and prepare surface.
- Starts to harden 2 minutes after mixing. Repair should be in place before hardening starts.
- A smooth finish can be obtained by rubbing with wet finger or damp cloth before hardening begins.
- FixitQuick can be drilled, filed, tapped sanded and machined after one hour of curing (hardening).
- Can be painted immediately, even before full hardening.
- FixitQuick can be used under water. Mix as usual and use the polyethylene wrapper, so material will not stick to hands as the FixitQuick is being forced onto the wet surface.
- Not recommended for use on polyethylene and polypropylene.
- Wash hands thoroughly with soap and water after using FixitQuick.

Mixing Directions

1. Break off required portion of material.

2. Twist and knead until uniform color is achieved-no streaks.

WELDING BLANKET
Part No. 21083

A 6 ft. x 6 ft. lightweight, soft and flexible welding blanket for draping over equipment or floor surfaces in welding areas, or as a vertical shield to protect from the spray of sparks, spatter and slag. Our fire and heat resistant welding blankets are made with a carbon fiber fabric that was developed from NASA technologies. The carbon fibers can withstand temperatures of 1800° F from contact with hot metal, weld spatter or the welding flame for short durations but should not be exposed to temperatures of 200° F for extended periods as the carbon fibers will break down. The blankets are easy to clean; just shake, vacuum or use compressed air to blow metal particles out.

Our Weather-Seal Wrap is a clear, plastic film that has an adhesive on one side that is strong enough to hold the wrap in place on almost any surface and seal out contaminants, yet it can be easily removed without pulling off paint, leaving adhesive residue or damaging the surface. With it you can seal out rain, snow, wind and dirt when windshields or door glass has been broken. In addition, Weather-Seal Wrap can be used to protect vehicle carpet and upholstery from soiling and spills. Apply it to paint booth walls and prevent over spray from discoloring white walls. Weather-Seal Wrap has 3 mils of plastic protection to preserve finishes that it covers so it can also be used as a temporary, protective coating against light abrasions.

UNIT PACKAGE: 1

Replacement Extractor Tools

The Drill-Out Broken Bolt Extractor is excellent for removing broken bolts and studs without damaging the threads in the hole. The drill body is manufactured using the finest quality hi-speed steel. The collet is produced from hot die steel, using the finest steel of its type. All Drill-Out Broken Bolt Extractors are made with a precision ground 118° left hand cutting self-centering point, and are heat treated for toughness.

Fast & Easy To Use.

Always Use Protective Eye Wear When Drilling.

1. Place the Drill-Out tool into an electric drill and set for reverse operation. Move the collet up to the chuck. Note: when the bolt is broken below a flange attached to a casting, reverse the collet as in (Fig. 1.)
2. Making sure the drill is set in reverse, place the tip of the Drill-Out on the center of the broken bolt and begin drilling. Do not allow the collet to move down towards the tip while drilling. If so, thread the collet back towards the chuck. Drill just deep enough to start a hole (approximately 1/16").
3. Make sure the hole is started on center of the bolt. If you reversed the collet in step 1, change it back at this time. Continue drilling. Stop just before you reach the front of the collet. Do not let the collet touch the end of the bolt. (Fig.2)
4. Remove the Drill-Out tool from the broken bolt. Move the collet down towards the tip so that 2 threads are showing. Bring drill up to speed and plunge it into the hole. The collet automatically engages and extracts the broken bolt. (Fig.3)

O.E.M. INTERCHANGE BY MANUFACTURER

The O.E.M. numbers listed in this interchange are cross referenced to the closest equivalent Auveco part. In some instances, the parts are not identically the same. There may be slight differences in the finished, length, washer O.D.: however, the Auveco part is designed to service the same application.

This interchange is not listed in strict numerical order (from the lowest number to the highest number.) Rather it is arranged in numerically ascending order from the left regardless of the number of digits in each O.E.M. number. Thus every number that begins with a 1 is listed before any number that begins with a 2. You should key on the first four digits to locate the number. For example, 1121865 is located before 11229 and after 11189734. OEM numbers that begin with a letter precede OEM numbers that begin with a numeral.

O.E.M. INTERCHANGE BY NUMERICAL ORDER

The O.E.M. numbers listed in this interchange are cross referenced to the closest equivalent Auveco part. In some instances, the parts are not identically the same. There may be slight differences in the finished, length, washer O.D.: however, the Auveco part is designed to service the same application.

This interchange is not listed in strict numerical order (from the lowest number to the highest number.) Rather it is arranged in numerically ascending order from the left regardless of the number of digits in each O.E.M. number. Thus every number that begins with a 1 is listed before any number that begins with a 2. You should key on the first four digits to locate the number. For example, 1121865 is located before 11229 and after 11189734. OEM numbers that begin with a letter precede OEM numbers that begin with a numeral.

FasTrack Web™ Cost Recovery System

Auveco's FasTrack Web, is a user-friendly software application, developed to assist collision repair shops in recovering the cost of trim clips, moulding clips and other fasteners used in automotive body repair.

Historically, the cost of fasteners used in collision repair has been an expense item that was not recovered by the body repair shop. Insurance companies usually refused to pay claims for these items without them being itemized into an invoice referencing the vehicle's repair order.

Technicians will rarely take time away from actual repair to prepare a detailed invoice. They don't view it as their job. As a result, these items are usually not invoiced and ultimately cost the collision repair shop hundreds of dollars each month in lost revenue.

With the help of FasTrack Web, these profit-draining parts now become a source of additional income for the collision repair shop.

The major benefit of FasTrack Web is its **ability to quickly and easily create the professional, accurate and detailed invoices** required by the insurance companies for reimbursement.

FasTrack Web works with a **database containing the complete line of the Auveco collision repair fasteners.** The FasTrack Web database includes detailed information on every item, including O.E.M. part numbers and current O.E.M. dealer list pricing. **FasTrack is the only software application of this type to use the actual dealer O.E.M. list pricing for the invoicing process.** This leads to unquestioned acceptance and payment by the insurance companies for the charges. The data is updated thru the year as Auveco adds new items or as the O.E.M. pricing changes.

The FasTrack Web application also offers extensive inventory control capabilities, an **iPHONE** or **Android** Scanning application or an (optional) USB bar-code scanning unit. **AUVECO'S FASTRACK WEB IS OFFERED ONLY THROUGH AUTHORIZED AUTO VEHICLE PARTS COMPANY DISTRIBUTORS.** For a Distributor in your area, call Customer Service at 1-800-354-9816 ext. 1.

Free 2 month Test Drive at www.auveco.com

FasTrack Web is simple and easy-to-use. **The application runs on any computer with internet access and a browser** such as Internet Explorer or Firefox. Once you obtain a login from Auveco, you're in business. There are **no annual updates to install since the data resides on our fast Internet server and is always up-to-date** with the latest parts and O.E.M. price information.

The FasTrack Web system will allow you to **quickly create professional invoice documents to enable recovery of the cost of body repair fasteners from the Insurance companies.** Because FasTrack Web is built around O.E.M. Dealer Price data and bills out at the manufacturer specific O.E.M. price thus providing a standardized cost basis you can count on acceptance and payment from the Insurance companies.

The reporting features of FasTrack Web allow the distributor to **gather usage information on what is moving at the shop level** for his supported shops. In addition, body shops have the **ability to add unique items** such as seam sealers, glue, tape, etc. to their personal account.

Should you want to **utilize a scanner** with FasTrack Web, take advantage of our **FREE App** on both the **IOS & ANDROID OS** (Free with subscription). We also offer a USB cable-type solution.

Still undecided? We have also included **labeling functions, various reports** such as tech usage & profit and loss, **kit building feature** and we have **video instructions** for the entire program!

AUVECO GREEN CATALOG

1700 of The Most Popular Auveco Part Numbers

The Auveco Green Catalog is a must for all body shops.

The Auveco Master Catalog that you are using is considered **THE ENCYCLOPEDIA OF THE AUTOMOTIVE BODY HARDWARE INDUSTRY** but a catalog of this magnitude can be overwhelming. So we've trimmed down our massive product line of over 20,000 items and produced the **extremely handy (Mini) AUVECO GREEN CATALOG**.

The **AUVECO GREEN CATALOG (part number GR-CAT)** contains over **1,700 of the most popular Auveco part numbers** divided by product group into 45 different sections. The clean, concise format makes it quick and easy to find the right part.

The AUVECO GREEN CATALOG features **trilingual verbiage** (English, Spanish and French-Canadian) and includes not only **actual size pictures** of all the products but **O.E.M. numbers**, pertinent specifications, dimensions, colors, plating information, etc. as well. The **AUVECO GREEN CATALOG takes the guess work out of identifying Body Hardware and Specialty Fasteners**. Determining the correct Auveco part numbers and unit package quantities has been made easy.

Items included on the Auveco Display Boards are identified in the AUVECO GREEN CATALOG with a ★ symbol. The Auveco display boards contain those items that we recommend as stocking items for all of our distributors.

The AUVECO GREEN CATALOG includes the **"AP" AuvecoPak part numbers** for those customers that have the **AuvecoPak Retail Merchandiser**.

HELPFUL HINTS

FOR USING THE AUVECO CATALOG

We have tried to make this catalog as easy as possible to use while still providing you with all the necessary information required to identify the part that you need. The features listed below should help you to quickly find the proper section of the catalog and determine the correct Auveco part number.

1. **The color-coded pages** signify various sections which are as follows:

- YELLOW - **New Items** (The latest items added to the Auveco product offering)
- BLUE - **Metric Items** (Cap Screws, Machine Screws, Body Bolts, Tapping Screws, Hex Nuts, Free Spinning Washer Nuts, Pushnut Bolt Retainers, "U" & "J" Nuts, Washers, Retaining Rings, Grease Fittings and miscellaneous items).
- BEIGE - **Electrical Accessories** (Solderless Terminals & Connectors, Wire & Loom, Battery Terminals, Heat Shrink Tubing, Fuses, Pigtails & Sockets, Miniature Bulbs, Switches, etc.)
- GREEN - **Assortments, Cabinets, Bins & Racks** (AuvecoPaks, Body Hardware Master Assortments, Small Drawer & Large Drawer "Fix-Kits", Quik-Select, Quik-Select II and "FP" 4 Pack Assortments)
- GRAY - **Key Blanks & Accessories** (Key Blanks, Tumblers, Springs & Lock Cylinders)
- PINK - **Import Car Body Hardware** (Non-threaded fasteners cataloged by import manufacturers from Acura to Volvo.)

2. We have **three different types of indexes** in the front of the book to assist you.

Pictorial QUICK INDEX - the pictures tell you at a glance which pages to turn to.

The section numbers correspond to the section numbers printed in the upper outside corner of each page. You can also easily see the sequence of the catalog - threaded fasteners, common non-threaded fasteners, electrical accessories, brass and grease fittings, rivets, kits, rubber products, glass shop supplies, motors and horns, trimming sundries and fasteners, domestic application body hardware, key blanks, import application body hardware, miscellaneous products and tools.

ALPHABETICAL INDEX is helpful when checking to see if we carry a specific product line. Popular categories are in bold type.

NUMERICAL INDEX for when you have the Auveco part number and need to know which page it is on.

3. Wherever practical, we have shown the **parts as actual size**. Unless the picture: is labeled "Not Actual Size", is a typical picture accompanying a chart or is obviously not actual size, you should be able to set a part on top of the picture to positively identify it.

4. We have included **Specification Charts** to assist you in the identification of various types of fasteners. The charts can be found on the following pages: **Body Bolts** (pages 20 & 49-50), **Special Tapping Screws** (pages 23-26 & 54-57), **License Plate Screws** (pages 33 - 34), **"Xmas Tree" Retainers** (pages 404-413) and **Push-Type Retainers** (Pages 450-460). The charts list the pertinent dimensions, plating and color information and the page number on which the actual size picture and application information is shown for each item.

5. At the back of the catalog are two **O.E.M. Part Number to Auveco Part Number Cross References**. One of these interchanges is broken down by O.E. manufacturer i.e., General Motors, Ford, etc. The other interchange combines all O.E.M. numbers together and is sequenced strictly in alpha-numeric order regardless of the manufacturer.

FASTENER TERMINOLOGY

Bolt: An externally threaded, headed fastener. Difference between a bolt and a screw is: a bolt is generally used through a hole with a mating nut; a screw is used in a threaded hole without a nut.

Class Of Thread: A system used to distinguish thread tolerance differences. Classes 1A, 2A, and 3A apply to external threads, and 1B, 2B, and 3B to internal threads. Classes 2 and 3 apply to both external and internal threads.

Crest: The outermost tip of male thread from the fastener cylinder, or innermost tip of female thread.

Driving Recess: A recess in the fastener head designed to accept a driving tool.

External Thread: The male thread. Thread outside of the cylinder surface.

Internal Thread: Female thread. Thread on the inside surface of a cylinder or cone.

Left-Hand Thread: Thread that winds counter-clockwise from the starting end of a fastener.

Major Diameter: The largest diameter of a screw thread, on a straight thread it is the diameter of an imaginary cylinder which would pass through the crest of an external thread or the root of an internal thread.

Minor Diameter: On a straight thread it is the diameter of an imaginary cylinder bounding the root of an external thread or the crest of an internal thread.

Nominal Diameter: Basic diameter that determines the size and dimensional limits of fasteners.

Pitch: Distance from a point of a screw thread to a corresponding point on the next thread measured parallel to the axis.

Right-Hand Thread: A thread that winds clockwise from the starting end of a fastener (when viewed from the starting end).

Screw: A headed fastener which is externally threaded.

Sems®: A term applied to preassembled screw and washer assemblies. Washers are placed on screws before roll threading. Threads being of larger diameter than the washer hole thus prevent the washer from slipping off the screw.

Stud: A threaded rod - at both ends or for entire length.

Tapping Screw: A hardened thread screw made to cut or form its own mating thread in an untapped hole.

Teks®: A screw which drills its own hole and then threads in.

Thread Pitch: The distance from the crest of one thread to crest of another.

WORLD'S LARGEST SELECTION OF AUTOMOTIVE BODY HARDWARE & SPECIALTY FASTENERS SERVICING THE AUTOMOTIVE, PBE, INDUSTRIAL & MRO MARKETS

In 2016 Auveco (Auto Vehicle Parts Co.) will have been manufacturing and distributing specialty automotive and industrial fasteners for **100 years**. Originally, Auto Vehicle Parts Co. manufactured trim parts and accessories for horse drawn carriages. Still family owned and now four generations later, Auveco is the World's Leader in servicing our customer's needs for body hardware and specialty fasteners through our worldwide Distributors. We market our products through traditional channels of distribution, selling only to authorized Distributors and O.E. manufacturers, in three types of packaging: small "unit package" quantities, a one price "retail program" for the "PBE" Jobber store and in large "bulk quantities" for the Expeditor / Distributor and O.E. manufacturer. In addition we offer a variety of different types of assortments and merchandising aids to ensure that all the customer's needs are met.

From a humble first edition of 50 pages and 56 items, the Auveco catalog has evolved into this current version of more than 800 pages covering over 20,000 different items. While this evolution has resulted in a catalog that is light years different from the initial publication, there is one characteristic that remains as true today as it was back then. The Auveco catalog is still regarded as **THE ENCYCLOPEDIA OF THE AUTOMOTIVE BODY HARDWARE INDUSTRY**. The company's goal also remains the same as it was a century ago: **COMPLETE CUSTOMER SATISFACTION WITH OUR PRODUCTS AND SERVICE**. To maintain this lofty level of excellence we go beyond just a dedication to product availability. Of course we continually add to our product line on an almost biweekly basis but we insist upon a dedication to quality of services at all levels throughout the company as well.

We realize we must constantly improve in order to be true to our commitment to **COMPLETE CUSTOMER SATISFACTION**. This means implementing the latest technologies to improve our ability to provide for our customers' ever-changing needs. Not only do we continually upgrade our warehouse fulfillment system to achieve improvements in accuracy and order turnaround but we also continually upgrade our web site with features that enhance our ability to serve our distributors and their customers. This includes updating code that further enhances speed, stability and ability to address more of our customers' needs as well as upgrading Internet Bandwidth and supporting servers. We welcome EDI inquires and provide features on our eCommerce site that enable the quick and easy upload of electronic order files directly into our system.

We continue to enhance and add features to our FasTrack Web internet based Cost Recovery software which is utilized by thousands of satisfied Body Shop users.

FasTrack Web...

A Cost Recovery System for
Automotive Body Fasteners
Used in Over 3,500 Collision Repair Facilities

According to body shop managers, almost 100% of the vehicles being repaired require additional items be added to the initial estimate. That's typically because fasteners weren't included in the estimate or because there was hidden damage and something was missed or forgotten during the estimating process. Rather than lose money on these items, the body shop needs to create a **supplemental invoice** to submit to the insurance company to cover the cost of the additional items.

Fastrack Web is the solution to that situation. It's an easy-to-use, web based application that enables Collision Repair Shops to quickly create an invoice for those items that need to be "added on" after the work has begun. Everything from fasteners to seam sealer to tapes to sand paper and more can be included on the supplemental invoice. No longer are they a profit draining cost of doing business for the body shop.

Fastrack Web includes over **10,000 Auveco Body Hardware and Specialty Fasteners** items. 10,000 items that are **pre-loaded** with a crossover to **O.E.M. part numbers with O.E.M. List Prices**. Thus the supplemental invoices are computed at the manufacturer specific O.E.M. price which provides a standardized cost basis preferred by insurance companies.

A **Technician Usage Sheet** makes it quick and easy for the tech to keep track of any items that are missing on the estimate. Down time can be further minimized if the tech uses a **bar code scanner** (we offer a **DataLogic** scanner) to speed up the process of compiling the additional items used in the repair of the vehicle.

FasTrack Web's **vast array of additional features** also includes the ability to **manage inventory**, **email orders** to a distributor, as well as **complete usage reporting**. Features geared toward helping keep profit percentages in the black.

Auveco's FasTrack Web is today's cutting edge technology and you can be sure we will continue to improve the product so that it's always the "best in the business".

428 very popular body hardware and fastener items shrink-wrapped onto seven convenient, time-saving 11" wide by 14" long display boards. These seven boards represent the parts that we recommend every distributor should be stocking and selling to all the body shops. While they don't necessarily contain "depth of coverage" within particular product groups, they do cover all the different body shop product groups.

The back of each board contains the appropriate information on part numbers, unit package quantities, OEM numbers and size specifications. The backs are protected by a clear plastic liner.
